

SP AL 90/60 TC telescopic separation profile

Part No.: 2097

Application area

The SP AL 90/60 TC is part of our SP TC telescopic gravel retaining profile range. SP AL 90/60 TC separation profiles are primarily designed to serve as gravel stops aka gravel retainers and ballast retaining trims i.e., to neatly separate gravel strips from the engineered growing medium on green roofs without hindering drainage properties. Selection of the upright face depends on the height required, 60 or 90 mm. Once length is set, the included locking clips secure the desired length of the profile. Suitable for flat to gentle inclines on roofs.

Benefits

- ☑ provides aesthetically pleasing demarcations among the various media and aggregate present on the green roof
- ☑ quick and easy to install without the need for mortar bedding
- ☑ due to its telescopic nature the length of the profile can be adjusted on site without the need to cut the profile
- ☑ timeless
- ☑ also available in measurements of 120/80 mm and 220/140 mm, prefabricated corners are also available in this range
- ☑ cost-effective delivery

Technical data

Height	90 mm
Width	60 mm
Length	2000 - 3900 mm
Plate thickness	0.8 mm
Weight	1.67 kg/unit
Material	Aluminium
Effective drainage area	5145 mm ² /m
Accessory	2 pcs locking clips
Packaging unit	180 pcs/pallet (702 m)

Specification suggestion

ArchiGreen® SP AL 90/60 TC is a telescopic, L-shaped separation profile, folded 5 times, made from aluminium. This profile provides professional and aesthetic demarcations among various aggregates on a green roof. Material thickness: 0.8 mm; size: 2000-3900×60×90 mm (L×W×H); drainage area: ~ 5145 mm²/m; weight: 1.67 kg/m; incl.: 2 locking clips/profile.
